for Regulatory Activities

MedDRA Coding Basics

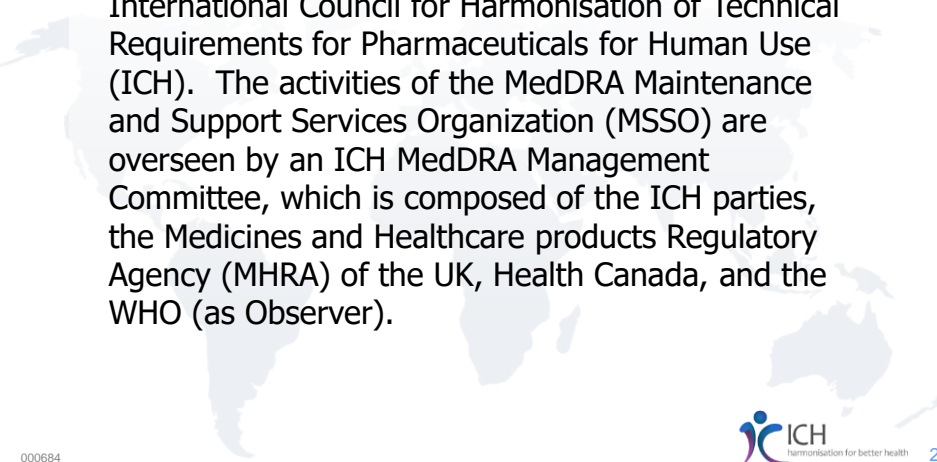

ICH
harmonisation for better health 1

MedDRA

MedDRA was developed under the auspices of the International Council for Harmonisation of Technical Requirements for Pharmaceuticals for Human Use (ICH). The activities of the MedDRA Maintenance and Support Services Organization (MSSO) are overseen by an ICH MedDRA Management Committee, which is composed of the ICH parties, the Medicines and Healthcare products Regulatory Agency (MHRA) of the UK, Health Canada, and the WHO (as Observer).

ICH
harmonisation for better health 2

MedDRA

Course Overview

- Gain knowledge of MedDRA's scope, structure, and characteristics
- Discuss coding conventions
- Learn about the MedDRA Term Selection: Points to Consider (MTS:PTC) document
- Learn about MedDRA browsers
- Watch a demonstration of coding with browser
- Use browser to code with MedDRA
- Conclude with question and answer session

000684

4

MedDRA Overview

000684

5

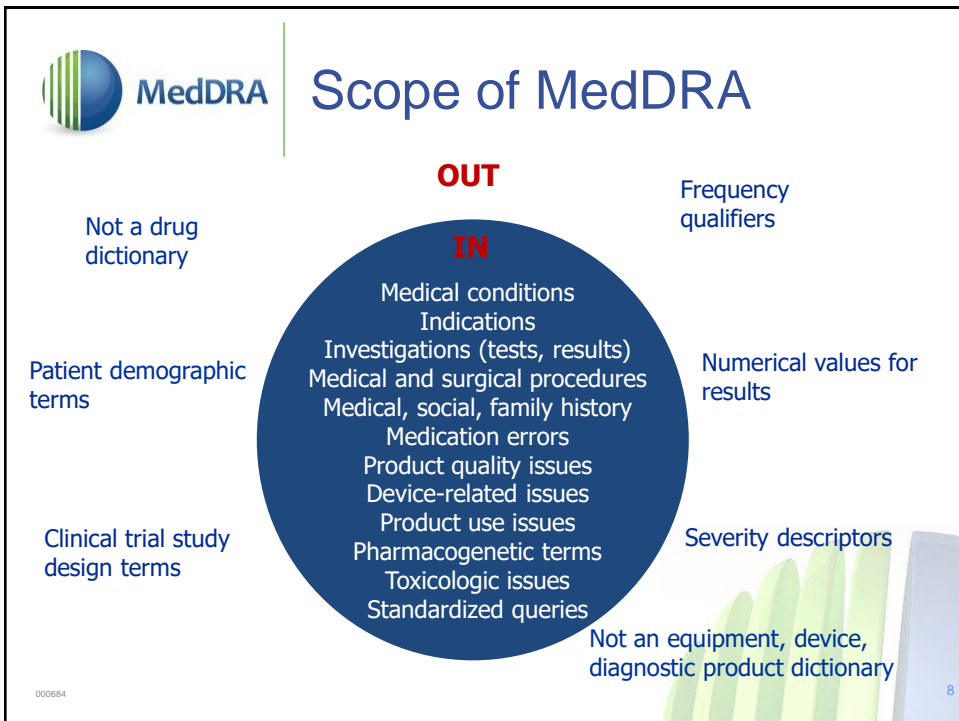

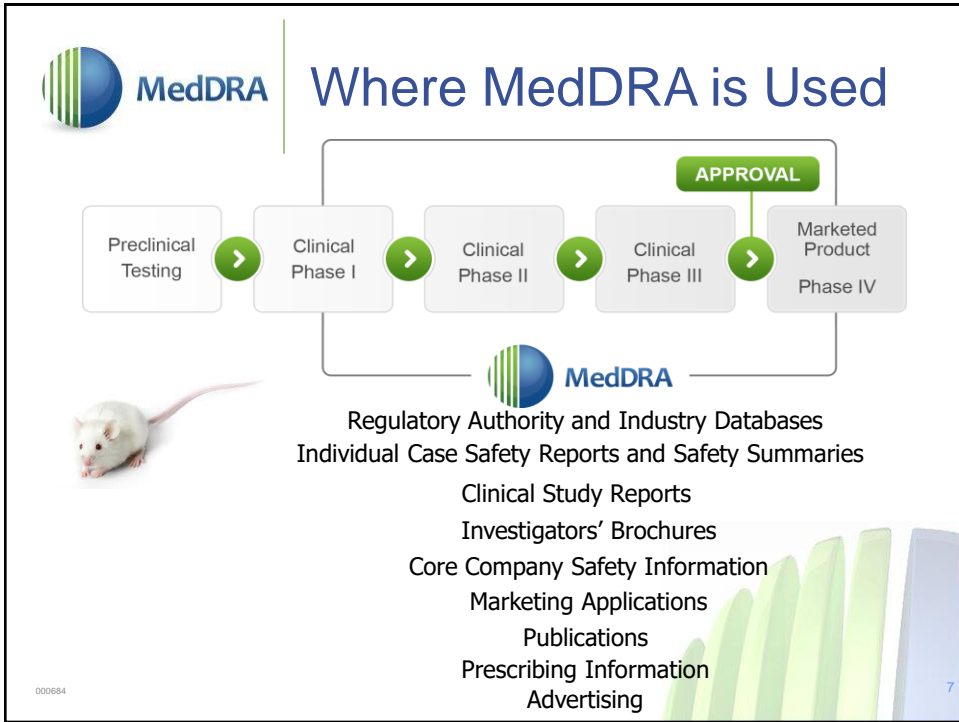

MedDRA Definition

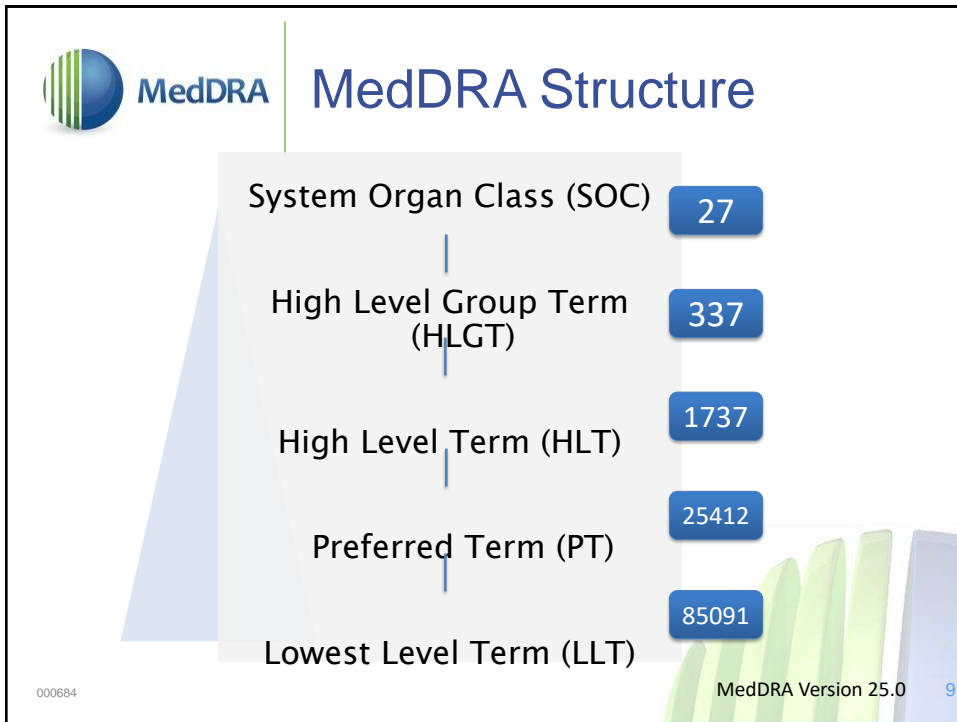

MedDRA is a clinically-validated international medical terminology used by regulatory authorities and the regulated biopharmaceutical industry. The terminology is used through the entire regulatory process, from pre-marketing to post-marketing, and for data entry, retrieval, evaluation, and presentation.

...No. de (USAGE) def-i-ni-tion /,defɪˈnɪʃən/n [C] a phrase that says exactly what a word, phrase, or id... definition in a dictionary [+ of] No one ha... a satisfactory definition of terrorism... something has a particular q... quality because

000684

6

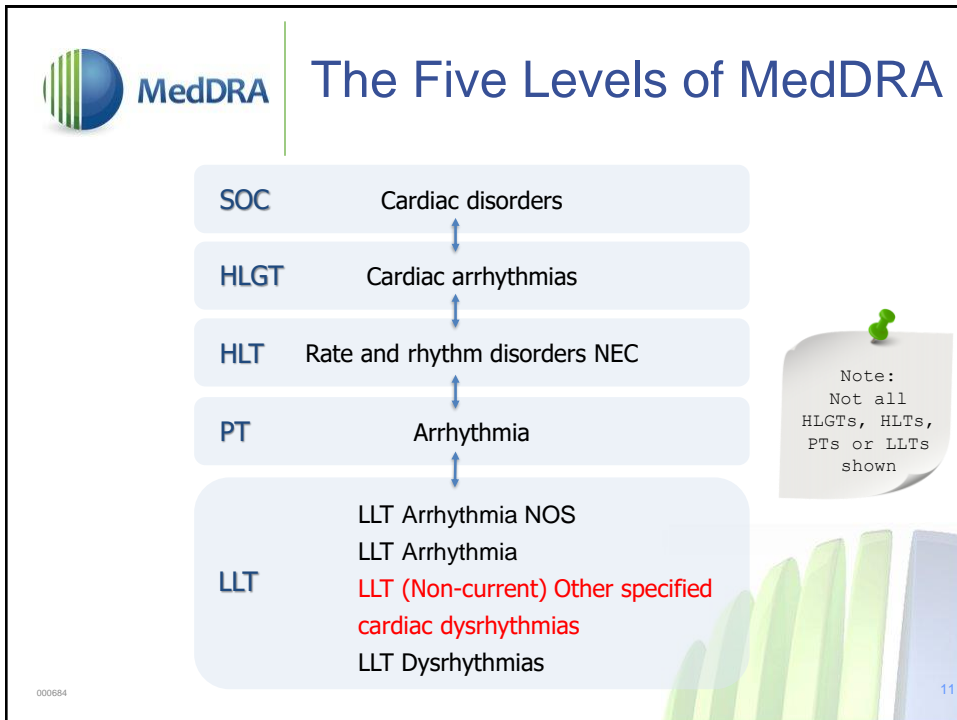

The diagram displays the 27 System Organ Classes (SOC) of MedDRA. The classes are listed in two columns, with a background image of human silhouettes. The classes are:

- Blood and lymphatic system disorders
- Cardiac disorders
- Congenital, familial and genetic disorders
- Ear and labyrinth disorders
- Endocrine disorders
- Eye disorders
- Gastrointestinal disorders
- General disorders and administration site conditions
- Hepatobiliary disorders
- Immune system disorders
- Infections and infestations
- Injury, poisoning and procedural complications
- Investigations
- Metabolism and nutrition disorders
- Musculoskeletal and connective tissue disorders
- Neoplasms benign, malignant and unspecified (incl cysts and polyps)
- Nervous system disorders
- Pregnancy, puerperium and perinatal conditions
- Product issues
- Psychiatric disorders
- Renal and urinary disorders
- Reproductive system and breast disorders
- Respiratory, thoracic and mediastinal disorders
- Skin and subcutaneous tissue disorders
- Social circumstances
- Surgical and medical procedures
- Vascular disorders

000684 10

The diagram shows the MedDRA logo and the title "Non-Current Terms" in blue text. To the right of the title is a red square containing the text "LLT".

- Flagged at the LLT level in MedDRA
- Not recommended for continued use
- Retained to preserve historical data for retrieval and analysis
- Terms that are vague, ambiguous, out-dated, truncated, or misspelled
- Terms derived from other terminologies that do not fit MedDRA rules

000684 12

MedDRA

MedDRA Codes

PT Anaemia

[10002034]

- Each MedDRA term is assigned an **8-digit numeric code**
 - Non-expressive
 - Assigned sequentially
- Codes can fulfill a data field in various electronic submission types (e.g., E2B)

000684

13

MedDRA

Current and Planned MedDRA Translations

000684

14

MedDRA

A Multi-Axial Terminology

Multi-axial = the representation of a medical concept in multiple SOC

- ✓ Allows grouping by different classifications
- ✓ Allows retrieval and presentation via different data sets

All PTs assigned a primary SOC

- ✓ Determines which SOC will represent a PT during cumulative data outputs
- ✓ Prevents "double counting"
- ✓ Supports standardized data presentation
- ✓ Pre-defined allocations should not be changed by users

000684

15

MedDRA

A Multi-Axial Terminology (cont)

SOC = Respiratory, thoracic and mediastinal disorders
(Secondary SOC)

HLGT = Respiratory tract infections

HLT = Viral upper respiratory tract infections

SOC = Infections and infestations
(Primary SOC)

HLGT = Viral infectious disorders

HLT = Influenza viral infections

PT = Influenza

000684

16

MedDRA

Rules for Primary SOC Allocation (cont.)

- PTs represented in only one SOC are automatically assigned that SOC as primary
- PTs for diseases, signs and symptoms are assigned to prime manifestation site SOC
- Congenital and hereditary anomalies terms have SOC *Congenital, familial and genetic disorders* as Primary SOC
- Neoplasms terms have SOC *Neoplasms benign, malignant and unspecified (incl cysts and polyps)* as Primary SOC
 - **Exception:** Cysts and polyps have prime manifestation site SOC as Primary SOC
- Infections and infestations terms have SOC *Infections and infestations* as Primary SOC

000684

17

MedDRA

Primary SOC Priority

If a PT links to more than one of the exceptions, the following priority will be used to determine primary SOC:

Congenital, familial and genetic disorders

Neoplasms benign, malignant and unspecified (incl cysts and polyps)

Infections and infestations

000684

18

A Multi-Axial Terminology (cont)

PTs in the following SOCs **only** appear in that particular SOC and not in others, i.e., they are not multi-axial

- *Investigations*
- *Surgical and medical procedures*
- *Social circumstances*

000684

19

Coding Conventions

000684

20

What are Coding for Conventions?

- Written guides and sets of principles for using MedDRA that help achieve consistency in coding and data retrieval
- Conventions harmonize exchange of MedDRA coded data worldwide
- Common topics
 - Misspellings, abbreviations and acronyms
 - Combination terms and “due to” concepts
 - “Always query” terms, e.g., “Chest pain”

000684

21

Why Do We Need Coding Conventions?

- Differences in medical aptitude of coders
- Consistency concerns (many more “choices” in MedDRA vs. older terminologies)
- Even with autoencoder, may still need manual coding

000684

22

MedDRA

Autoencoder Pitfalls

- Inappropriate terms may be selected by autoencoder
- Review all autoencoding carefully
 - “Allergic to CAT scan” autoencoded as:
LLT *Allergic to cats*
 - “Myocardial infarction in the fall of 2000” autoencoded as:
LLT *Myocardial infarction*
LLT *Fall*

MedDRA® trademark is registered by ICH

000684

- Provides term selection advice for industry and regulatory purposes
- Objective is to promote accurate and consistent term selection to facilitate common understanding of shared data
- Recommended to be used as basis for individual organization's own coding conventions

25

MedDRA

MedDRA Term Selection: PTC (cont)

- Developed by a working group of the ICH Management Committee
- Updated annually in March
- Complete versions available in
 - English, Japanese, Chinese, Korean, Spanish, and Russian
- Condensed versions available for other MedDRA languages
- Available on MedDRA and JMO websites

000684

26

MedDRA

MTS:PTC Points of Note

- In some cases, with more than one option for selecting terms, a “preferred option” is identified but this does not limit MedDRA users to applying that option. Organizations should be consistent in their choice of option.
- Section 4.1 – Versioning (Appendix)
 - 4.1.1 Versioning methodologies
 - 4.1.2 Timing of version implementation

000684

27

MedDRA

General Term Selection Principles

- Quality of Source Data
- Quality Assurance
- Do Not Alter MedDRA
- Always Select a Lowest Level Term
- Select Only Current Lowest Level Terms
- When to Request a Term
- Use of Medical Judgment in Term Selection
- Select Terms for All Reported Information, Do Not Add Information

000684

28

Quality of Source Data Quality Assurance

- Quality of original information impacts quality of output
- Obtain clarification of data
- Can be optimized by careful design of data collection forms and proper training of staff
- Organizations' coding guidelines should be consistent with MTS:PTC
- Review of term selection by qualified individuals
- Human oversight of automated coding results

000684

29

Do Not Alter MedDRA

- MedDRA is a standardized terminology with a pre-defined term hierarchy
- Users must not make *ad hoc* structural alterations, including changing the primary SOC allocation

If terms are incorrectly placed, submit a change request to the MSSO

000681

30

MedDRA

MTS:PTC General Principle

- Always Select a Lowest Level Term
Select Only Current LLTs

- ✓ Select the Lowest Level Term that most accurately reflects the reported verbatim information

"Abscess on face"

→ Do not simply select LLT *Abscess*

→ Select a term with greater specificity LLT *Facial abscess*

- ✓ Select current LLTs only
 - Non-current terms for legacy conversion/historical purposes

000684

31

MedDRA

When to Request a Term Use of Medical Judgment

- Avoid company-specific "work-arounds" for MedDRA deficiencies. If concept not adequately represented in MedDRA, submit Change Request to MSSO.
- If no exact match in MedDRA, use medical judgment to match to an existing term that adequately represents the concept

000684

32

MedDRA

Select Terms for All Reported Information

- Select terms for every AR/AE reported, regardless of causal association
- Select terms for device-related events, product quality issues, medication errors, medical and social history, investigations and indications as appropriate

000684

33

MedDRA

Do Not Add Information

- Do not make diagnosis if only signs/symptoms reported

Reported	LLT Selected	Comment
Abdominal pain, increased serum amylase, and increased serum lipase	Abdominal pain	It is inappropriate to assign an LLT for diagnosis of "pancreatitis"
	Serum amylase increased	
	Lipase increased	

000684

34

MedDRA

Term Selection Points

Section 3

- Diagnoses and Provisional Diagnoses with or without Signs and Symptoms
- Death and Other Patient Outcomes
- Suicide and Self-Harm
- Conflicting/Ambiguous/Vague Information
- Combination Terms
- Age vs. Event Specificity
- Body Site vs. Event Specificity
- Location-Specific vs. Microorganism-Specific Infection
- Modification of Pre-existing Conditions
- Exposures During Pregnancy and Breast Feeding
- Congenital Terms
- Neoplasms
- Medical and Surgical Procedures
- Investigations

000684

35

MedDRA

Term Selection Points

Section 3

- Medication Errors, Accidental Exposures and Occupational Exposures
- Misuse, Abuse and Addiction
- Transmission of Infectious Agent via Product
- Overdose, Toxicity and Poisoning
- Device-related Terms
- Drug Interactions
- No Adverse Effect and "Normal" Terms
- Unexpected Therapeutic Effect
- Modification of Effect
- Social Circumstances
- Medical and Social History
- Indication for Product Use
- Off Label Use
- Product Quality Issues

000684

36

Introduction to MedDRA Browsers

000684

37

MSSO's MedDRA Browsers

MedDRA Desktop Browser (MDB)
Download MDB and release files from MedDRA website

MedDRA Web-Based Browser (WBB)
<https://tools.meddra.org/wbb/>

Mobile MedDRA Browser

<https://mmb.meddra.org>

000

38

MSSO's MedDRA Browsers (cont)

- Features
 - Each require MedDRA ID and password
 - View/search MedDRA and SMQs
 - Support for all MedDRA languages
 - Language specific interface
 - Ability to export search results and Research Bin to local file system (MDB and WBB only)

000684

39

MDB and WBB Special Features

- Preview upcoming (supplemental) changes in next release*

**Supplemental view not available on MDB*

- View primary **and** secondary link information
- Upload terms to run against SMQs
- Advanced search options (e.g., NOT, OR)

000684

40

MedDRA

MedDRA Browser Demonstration

000684

41

This slide features the MedDRA logo in the top left corner, consisting of a blue circle with vertical green and white stripes. The text 'MedDRA' is positioned to the right of the logo. The main title 'MedDRA Browser Demonstration' is centered in a green font. In the bottom left corner, the number '000684' is displayed. In the bottom right corner, the number '41' is shown. A decorative vertical bar on the right side is divided into blue and green segments. The bottom right corner contains a graphic of several overlapping, rounded rectangular shapes in shades of green and blue.

MedDRA

Approach to Finding Best LLTs

000684

42

This slide features the MedDRA logo in the top left corner, consisting of a blue circle with vertical green and white stripes. The text 'MedDRA' is positioned to the right of the logo. The main title 'Approach to Finding Best LLTs' is centered in a green font. In the bottom left corner, the number '000684' is displayed. In the bottom right corner, the number '42' is shown. A decorative vertical bar on the right side is divided into blue and green segments. The bottom right corner contains a graphic of several overlapping, rounded rectangular shapes in shades of green and blue.

Assessing the Reported Information

- Consider what is being reported. Is it a:
 - Clinical condition - Diagnosis, sign or symptom?
 - Indication?
 - Test result?
 - Injury?
 - Procedure?
 - Medication error?
 - Product use issue?
 - Product quality issue?
 - Social circumstance?
 - Device issue?
 - Procedural complication?
- **Is it a combination of these?**

The type of report will influence the way you search for a suitable LLT. It may indicate in which SOC you expect to find the closest match.

000684

43

Coding Example 1

Specificity

The patient suffered from an allergic reaction to an antibiotic

000684

44

MedDRA

Coding Example 2

Symptoms

The patient states she has been experiencing cold sweats

000684

45

MedDRA

Coding Example 3

Investigations

Lab results indicate the patient has increased troponin and increased CPK-MB

000684

46

MedDRA

Coding Example 4

Medication errors

Patient accidentally took drug Y instead of drug X
and became short of breath

000684

47

MedDRA

Coding Example 5

Patient demographics

A 2 day old baby was noted to have a mild fever

000684

48

MedDRA

Coding Example 6

Indications

A 35 year old woman was taking Drug X to prevent relapses of multiple sclerosis

000684

49

MedDRA

Coding Example 7

Specificity

She had a pathologic fracture of the neck of the left femur

000684

50

MedDRA

Coding Example 8

Specificity

Following the procedure, the patient experienced several days of constipation

000684

51

MedDRA

Coding Example 9

Death and other patient outcomes

The 66 year old man died from a ruptured aortic aneurysm

000684

52

MedDRA

Coding Example 10

Product quality issues

It was determined that the product was counterfeit

000684

53

MedDRA

Coding Example 11

Social circumstances

The patient was confined to a wheelchair

000684

54

MedDRA

Coding Example 12

Medication errors/Product use errors and issues

The pharmacist made a mistake in compounding the medication

000684

55

MedDRA

Coding Example 13

Narrative vignette

A 75-year-old male receiving Drug X for rheumatoid arthritis developed symptomatic aortic valve stenosis. The patient's medical history is significant for colon cancer and cigarette smoking. He underwent an aortic valve replacement and developed a sternal wound infection three days post-surgery.

000684

56

Additional Coding Exercises

000684

57

Try to Code Some Verbatims

- Open either the Desktop or Web-Based Browser
- Try to find the best LLT to code several short verbatims
- Select an LLT from MedDRA using either a "top down" or "bottom up" approach
- Use Poll Everywhere to submit your proposed answers
- Correct LLTs for each verbatim will be discussed

000684

58

MedDRA

Short Verbatim #1

“She was diagnosed with pneumonia caused by COVID-19 infection”

000684

59

MedDRA

Short Verbatim #2

“Woman ingested her husband's blood pressure drug by mistake”

000684

60

MedDRA

Short Verbatim #3

“The patient developed hyponatraemia while hospitalised”

000684

61

MedDRA

Short Verbatim #4

“Nurse noticed that the injection solution had an unusual odor”

000684

62

MedDRA

Short Verbatim #5

“Elderly woman complained her arm was tender where she had received her seasonal flu vaccine”

000684

63

MedDRA

Summary

- ✓ Discussed scope, structure, and characteristics of MedDRA
- ✓ Discussed coding conventions
- ✓ Introduced the MedDRA Term Selection: Points to Consider document
- ✓ Introduced the MedDRA browser and showed how it is used for coding
- ✓ Performed some coding exercises on your own
